# Road Transport & Truck Ecosystem Pavilion

June 24-26, 2026

Shanghai New International Expo Centre

## transport logistic China × G7 Connect Your gateway to the future of road transport

In a powerful collaboration for 2026, transport logistic China partners with industry pioneer G7 Connect to present the Road Transport & Truck Ecosystem Pavilion. This dedicated platform focuses on the future of road transport, emphasizing electrification, sustainable logistics, and the innovative technologies that are transforming the trucking industry for global markets.

Together, it integrates premium resources to present an industry event combining a showcase area and an accompanying conference.

## Your four reasons to attend

### » Global Reach, Local Insight:

Leverage the unparalleled international network of transport logistic China.

### » Connect with Potential Clients:

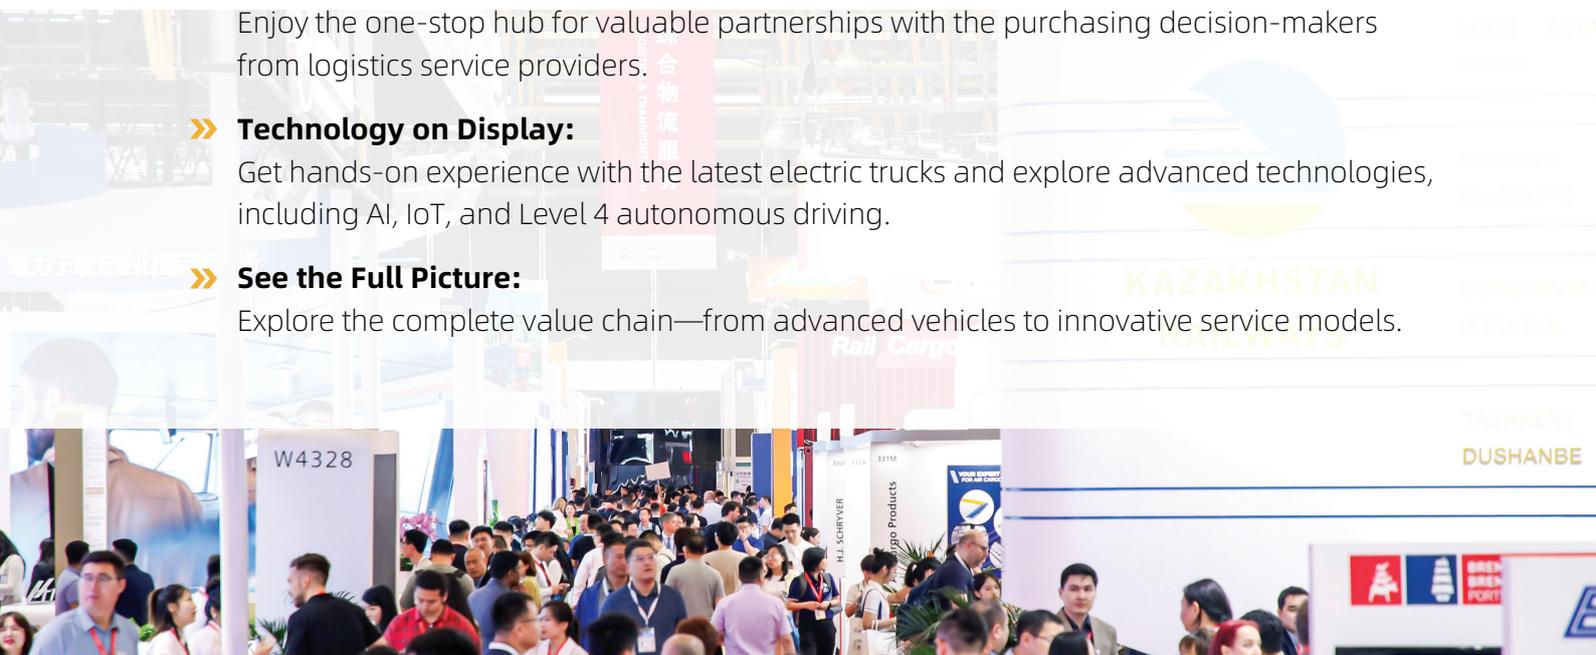

Enjoy the one-stop hub for valuable partnerships with the purchasing decision-makers from logistics service providers.

### » Technology on Display:

Get hands-on experience with the latest electric trucks and explore advanced technologies, including AI, IoT, and Level 4 autonomous driving.

### » See the Full Picture:

Explore the complete value chain—from advanced vehicles to innovative service models.

# Exhibition sectors: Where innovation meets scenario

### Trucks & Equipment

Heavy truck / Light truck / Urban delivery / Refrigerator truck / Last-mile delivery/ New-energy vehicle / Autonomous vehicle / Dangerous goods transport vehicle / Smart trailers & digital containers

### Energy & Assets

Battery & hydrogen tech / Leasing & trading platform / Charging & swapping infrastructure / Hydrogenator / Energy storage / Operational networks / Asset safety & lifecycle management

### Road Transportation & Platforms

Logistics service / Contract Logistics / Cross-border trucking / Urban & last-mile delivery / Fleets / Load matching platform / Fleet management / Supply chain collaboration / Truck leasing platform

### Freight Tech & Ecosystem Partners

Cloud, big data & AI / IoT / Monitoring & safety / Vehicle-road coordination & high-precision maps / Insurance / Financial service

# Accompanying conference: "AI Technologies of Road Transport"

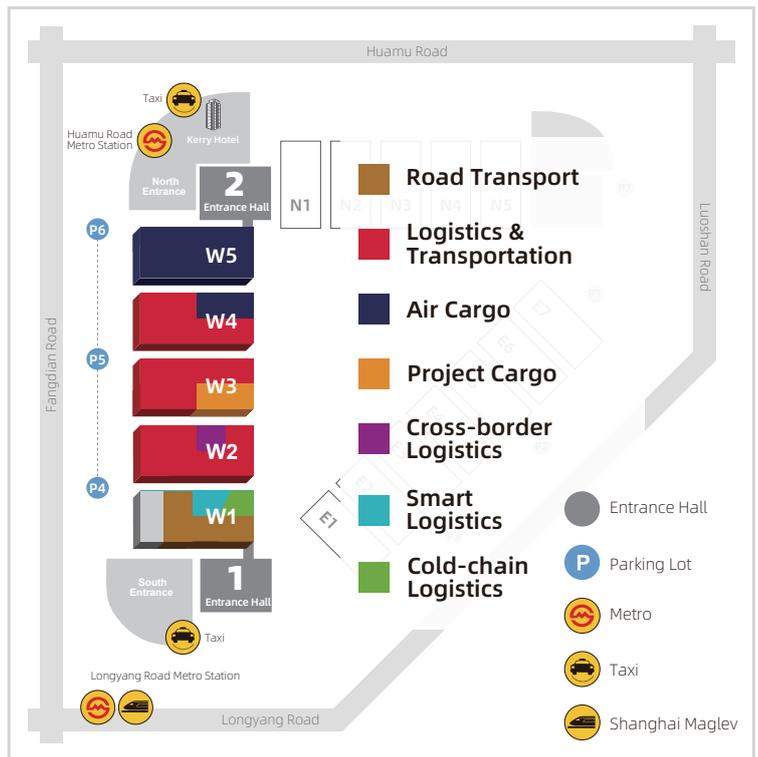

Alongside the exhibition, an accompanying conference will be held onsite. It is the definitive forum where strategy translates into action. Focusing on the powerful convergence of AI and new energy, it gathers the entire road freight community—from cargo owners and logistics operators to technologists and ancillary service providers—to define the next chapter for the industry.
